

Are you a business owner in Pennsylvania?

Do you want to help improve children's education?

Please take a moment to review the Pennsylvania Education Improvement Tax Credit. The Pennsylvania Education Improvement Tax Credit (EITC) is a program where a business can make a contribution to an approved Pennsylvania educational institution and claim up to 75% of the contributed amount as a credit against Pennsylvania business tax liabilities. (90% credit may be available for certain 2 year commitments.)

The contribution amount is also allowed as a deduction against the business' taxable income, resulting in significant tax savings for the business. Also, if the business making the contribution is an S-corporation or partnership, any EITC unused by the business can be transferred to shareholders or partners for use as a credit against their individual income tax liabilities.

If you want to save taxes and at the same time help improve education in the Commonwealth of Pennsylvania, please contact us and we can discuss with you in more detail how you can do this through the Pennsylvania EITC.
